Subject: Phasing out the Draize

Dear William Stokes:

We urge ICCVAM/NICEATM to recommend that federal agencies begin accepting

the alternative methods found to be useful, and to move forward with recommended improvements in the alternatives without delaying the acceptance

of the tests' current forms.

Please consider going beyond the current efforts by developing and validating nonanimal methods to completely replace the use of the Draize test.

You can make a compassionate humane difference by reducing and hopefully eventually eliminating labortary animal pain and suffering.

Sincerely,

Lisa Meyer Robert Meyer Joyce Foltz Jay Minnick Anne Meyer
